🔗 Portfolio

📄 PROFILE

I'm a full-stack software developer and BIM specialist based in Rwanda. I specialize in full-stack software development and BIM technologies, providing innovative solutions for the construction industry. With expertise in modern web/mobile development and building information modeling, I enjoy solving complex problems in software engineering and construction project management.

📁 PROFESSIONAL EXPERIENCE

Digital Cost Estimation

BIM Specialist

09/2024 – 07/2026

- Developed platforms for employee management, project budget planning, and construction cost estimation.
- Created custom plugins for Revit and Archicad to export and report BIM data.
- Built cost estimation tools for generating bills of quantities in construction planning.

Is Technologies Lt

Front-end developer

04/2024 – 08/2025 | Rubavu, Rwanda

Developed a secure, interactive web application with a modern front-end framework (React.js) and an intuitive user interface. I styled it with Tailwind CSS. Here is it's live link

Upwork

Freelancer

02/2024 – 12/2025 | Remote

Serves as a top-rated freelancer at upwork, contribution to many projects.

Kick side Rwanda

Frontend Developer

08/2024 – 12/2024

- Developed modern websites, including the official Kickside newspaper publishing site.
- Collaborated with backend teams on complex construction and software solutions.
- Implemented responsive designs and optimized UX across projects.

ACORN APPRAISALS

Fullstack Software Developer

09/2025 – 08/2026 | Canada

- Developed comprehensive Smart Evaluation system for structured reporting with chapters/sub-chapters, interactive charts, tables, and visual assets.
- Implemented collaboration features and scalable report generation/export (PDF/Word).
- Built modern, responsive business website.

🎓 EDUCATION

Highschool

Rwanda Coding Academy

09/2023 – 07/2026 | Nyabihu

TECHNICAL SKILLS

- MongoDB
- Node.js
- React Native
- PostgreSQL
- MySQL
- Python
- MQL5
- RESTful APIs
- Java
- JavaScript
- Prisma
- BIM Technologies
- HTML & CSS
- Tailwind CSS
- Git

PROJECTS

Ranga [↗](#)

AI Powered Lost and Found Platform for Rwanda

05/2026 – 08/2026

Built Ranga, an AI-powered lost-and-found platform for Rwanda that helps people recover lost belongings and important documents before seeking replacements through services like Irembo. Implemented intelligent matching, OCR, sensitive-data blurring, identity verification, and secure rewards.

Zero QS [↗](#)

AI-Augmented Quantity Surveying Platform for Africa

09/01/2026 – 12/08/2026

Built Zero QS, an AI-augmented quantity surveying platform designed for African construction professionals. The platform helps quantity surveyors build Bills of Quantity (BOQ) and Bills of Materials (BOM) automatically using AI and results are automatically sent to take off project specific.

HOBBIES

- Coffee-fueled coding sessions
- Swimming
- Exploring cryptocurrency and blockchain
